

EyeROV is a Marine Robotics & AI Company
Working in Oil & Gas, Hydro, Defence, Search &
Recovery, Maritime & Water Sector

About Us

EyeROV leverages advanced robotics and AI to enable safer, faster, and more efficient inspections through its Remotely Operated Vehicles (ROVs) and Unmanned Surface Vehicles (USVs), purpose-built for a wide range of subsea and surface applications.

8 years of dedication have led us to great achievements

A partial view of the Earth from space, showing the horizon and some landmasses.

80⁺ Completed Projects

800⁺ Field Days

2500⁺ ROV Inspection Hours

5⁺ Countries
(Operating In India, GCC, Europe, South East Asia)

EyeROV's Executive Team

Proven management team in commercializing technology, global management, and ocean related services and technology development

Johns T. Mathai

Co-Founder & CEO

Master's in Electrical Engineering

Kannappa Palaniappan P.

Co-founder & CTO

Master's in Ocean Engineering

Sebastian K T

General Manager - Operations

Dr. Vishal Raveendranathan

Senior Manager- R&D

Sruthi Ramesh

Senior Manager - HR

Sulfikar Yousaf

Senior Manager - Finance

Akhil Manisery

Senior Manager- Sales & Marketing

Our Vision

EyeROV envisions becoming a global leader in marine robotics by delivering advanced solutions for subsea assets across the infrastructure, energy and maritime sectors, & being a pioneering provider of innovative and reliable products for defense and search-and-rescue (SAR) missions.

- World Class Deep tech Solutions backed by **Patents and Intellectual Property**
- **High entry barrier** Industry where EyeROV has been working for 8 years
- Building more **safer, efficient** and **sustainable** solutions
- Expanding to **GCC → SEA → North America** in coming years
- **“Make in India and Sell to the World”**

Products

TUNA

Remotely
Operated Vehicle
(ROV)

Dimension = 500 x 400 x 500 mm

Weight = 25 Kg (In Air)

Speed = upto 2 Knots

Endurance = 1–2 Hrs (On Battery),
External Power

Depth Rating = Upto 300 m

SAGARA

Remotely
Operated Vehicle
(ROV)

Dimension = 890 x 510 x 390 mm

Weight = 40 Kg (In Air)

Speed = upto 3 Knots

Endurance = External Power

Depth Rating = Upto 300 m

i-Boat Alpha

Autonomous
Surface Vehicle
(ASV)

Dimension = 1050 x 860 x 860 mm

Weight = 30 Kg

Speed = upto 6 Knots

Endurance = 2 To 3 hrs

GVI - General Visual Inspection

- Qualitative visual information about the integrity and health of your tank infrastructure, EyeROV TUNA assists in inspecting the tank floor, internals, wall, or roof.

Multiple Cameras and lighting

Thickness measurement of Tank

- Qualitative visual information about the integrity and health of your tank infrastructure, EyeROV TUNA assists in inspecting the tank floor, internals, wall, or roof.

To measure the thickness of materials and thus determine the flaws

UT sensor

Data Processing & Reporting : EVAP for Tank Inspection

EyeROV Visualization and Analytics Platform

Project name

ACW Pipeline Robotic Inspection

Project id

ER34-KA-UPCL-I-5700310724/1

Project location

Udupi Power Corporation Limited,
Yelluru Village, Padubidri,
Karnataka

Inspection duration

From 27-06-2022 To 29-06-2022

Length of pipeline

665m

Diameter of pipeline

700mm and 1000mm

Project

(Line-3) Left 0-160m (Reverse)

Bottom Plate of Tank

Sl No	Depth (m)	Thickness (mm)	Original thickness (mm)
1	7.68	11.90	12
2	7.68	11.95	12
3	7.69	12	12
4	7.69	11.90	12
5	7.69	11.95	12
6	7.69	11.95	12
7	7.69	11.70	12
8	7.69	11.80	12

WHY EYEROV?

- Extensive capability to customize ROV systems based on client requirement
- Advanced Computer Vision AI/ML based image and video processing and analytics capabilities
- Advanced Software reporting platforms and dashboard for intuitive data representations
- Served O&G giants like BPCL (India)
- 100+ Project, 2500+ hours of underwater ROV inspection experience

Case Study

20 August, 2024

UT INSPECTION OF TANK

Client

IOCL DEMO

Location

Jaipur, Rajasthan

No of Days

1

Scope of work

- ROV based internal visual testing of the tank shell, tank bottom and roof bottom (above water surface) and UTC measurement of tank shell and bottom plate.

Equipment used

- ROV EyeROV Tuna with high definition camera and UT probe was employed for the mission.
- Additional Resources such as Generator, Man Powers, Tether, Electronic Hardware were used.

Result

- To collect 20-30 no of UT points approx. in Bottom Plate and Shell Plate

Case Study

4 March, 2024

KARWAR UT SURVEY OF VESSEL

Client

Location

Karwar

No of Days

1

Detailed Report: [Link](#)

Scope of work

To demonstrate the product capabilities. Of EyeROV TUNA.

Equipment used

ROV EyeROV Tuna with high definition camera, Imaging SONAR and UT probe was employed for the mission.

- Additional Resources such as Generator, Man Powers, Tether, Electronic Hardware were used.

Result

UT measurements of different points of 0.5 sqm area were recorded.

- Consolidated findings in Hard and Soft Copy Reports were made.

Case Study

30 June, 2022

UDUPI POWER CORPORATION LIMITED

Client

adani

Location

Udupi, Karnataka

No of Days

4 Days

Detailed Report: [Link](#)

Scope of work

- Internal Inspection of 1000mm and 700mm dia ACW MS Discharge pipeline of about 700m length.
- To identify and measure defects/anomalies/coating conditions using a Remotely Operated Underwater vehicle

Equipment used

- ROV EyeROV Tuna with cameras for accessing critical points from different angles, Proflyng sonar.
- Additional Resources such as Generator, Man Power, Tether, Electronic Hardware were used.

Result

- Employed Image Processing tool such as EVAP (our Inhouse Enhancing Tool) for enhancing RAW Images.
- Consolidated findings in Hard and Soft Copy Reports and transferred to Relevant Authorities.

Case Study

08 July, 2023

OLINDA STAR RIG INSPECTION

Detailed Report : [Link](#)

Client

Location

Kakkinada, Andhra Pradesh

No of Days

4 Days

Scope of work

- To conduct the visual inspection of various structural parts of the Olinda star Rig.

Equipment used

- ROV EyeROV Tuna with high definition camera and laser scalar were employed for the mission.
- Additional Resources such as Generator, Man Powers, Tether, Electronic Hardware were used

Result

- Employed Image Processing tool such as EVAP (our Inhouse Enhancing Tool) for enhancing RAW Images.
- Consolidated findings in Hard and Soft Copy Reports and transferred to Relevant Authorities

Case Study

12 November, 2020

BPCL Pipeline Inspection

Client

Location

Kochi, Kerala

No of Days

1 Day

Detailed Report: [Link](#)

Scope of work

- Internal Inspection of 40" internally cement lined water pipeline
- Distance 400m

Equipment used

- ROV EyeROV Tuna integrated with Components such as Generator, onboard control station, Tether, Electronic Hardware were also used.
- Employed Image Processing tools such as EVAP (our Inhouse Enhancing Tool) for enhancing RAW Images.

Result

- Employed Image Processing tool such as EVAP
- Overlaying of Videos
- Consolidated findings in Hard and Soft Copy Reports and transferred to Relevant Authorities.

Awards & Achievements

Receiving National Startup Award 2022 From
The Hon'ble Minister Of Commerce & Industry

Winner of Dare to Dream 3.0, receiving award
from the Hon'ble Minister of Defense

Winner of IIGP 2018

Receiving Gold medal in the Avinya Energy
Startup Challenge, Ministry of Petroleum
and Natural Gas, India
