

India's First Commercial Underwater Drone

EYEROV TUNA PRO

ETP 3000

Product Description

The EyeROV TUNA PRO – ETP 3000 is a high performance variant of the TUNA ROV Fleet. It is a custom modular ROV (Remotely Operated Vehicle) designed with high performance onboard computers and an intuitive control console for critical infrastructure inspection and surveillance operations.

TUNA PRO Features & Benefits

The TUNA PRO is engineered to accommodate custom payloads tailored to specific operational requirements. With a wide range of compatible attachments and sensors, its adaptability and versatility makes it the ideal ROV for diverse mission profiles.

- Depth Rating: 300 meters
- Optimized 5-Thruster Configuration
- Supports Multiple Payloads: Sonars, Manipulators, Positioning Sensors
- Hybrid Power Options
- Lightweight & Portable
- Intuitive Control & Navigation Software
- Camera: 4K Primary, 1080p HD Secondary
- Lighting: Up to 6×1500 lumens LED lights
- 2 kg Payload Capacity

Product Specifications

TECHNICAL SPECIFICATION

- Depth Rating : Up to 300 m
- Speed : Up to 2 knots (In still water)
- Dimensions : 500 x 400 x 500 mm
- Weight : 22 kg (Air)
- Buoyancy : Slightly Positive in Freshwater
- Payload Capacity : 2 kg with 20 x 20 x 20 cm space
- Thrust : 13 kgf in Surge and Sway
- Construction : Impact & Corrosion Resistant HDPE Frame
: Anodized Aluminium 6061 Hull
: Coated Polyurethane foam
- Power : Hybrid (External Power and Battery)
- Battery : 500 Wh Li-ion battery
- External Power : 1.6 KW 230V AC Supply
- Endurance : Up to 2 hrs on battery & Unlimited on tether

STANDARD PAYLOADS

- Primary Camera : 4K 8MP H265 Low light IP camera with 90° diagonal FOV & 45° tilt
- Secondary Camera : Full HD 1080p H264 low light IP Camera
- Lights : 6 x 1500 lumen LED Lights
- Sensors : AHRS/IMU with 3 axis Accelerometer, Gyroscope and Compass
: Depth Sensor
: Temperature Sensor (Internal & External)
: Leak Sensor
: Voltage & Current Sensor

TETHER

- Length : Up to 300 m
- Diameter : 14 mm
- Buoyancy : Neutral in Fresh water
- Tensile Strength : > 300 kgf
- Winch : Manually operated with integrated slip rings

OPERATIONAL CAPABILITIES

- Piloting Modes : Manual, Auto Heading, Auto Depth
- Autonomous Operation : Station Keeping
: Waypoint Navigation
(When equipped with suitable payloads)
- Area of Operation : 300 m radius
- Portability : Carriable by 2 crew

OPERATOR CONTROL UNIT

- Portable and rugged control computer
- 13" Sunlight readable display (Higher option available)
- iControl Hub Software
- Programmable hand controller with Multiple Axis & Button.
- Onboard data recording and logging

OPTIONAL PAYLOADS

- Echo Sounder
- Side Scan Sonar
- Profiling Sonar
- Multibeam Imaging Sonar
- Manipulator Arm
- Doppler Velocity Log (DVL)
- Laser Scaler
- Underwater Positioning System (USBL)
- Ultrasonic Thickness Gauge

ROV

Payloads

Laser Scaler

Caviblaster

CP Probe

Thickness Gauge

Side Scan Sonar

Imaging SONAR

Tunnel Profiling SONAR

Echo Sounder

Doppler Velocity Log

Manipulator Arm

USBL

3 DOF Robotic Arm

Applications

DAMS & TUNNELS

Structural integrity assessments of dam upstream and downstream face, intake structures, penstocks, and tunnels without draining or diver entry.

BRIDGE

Underwater inspection of bridge foundations and piers for erosion, scouring, and damage detection.

OIL & GAS

ROVs support offshore and nearshore operations through subsea pipeline inspection, platform structure monitoring, leak detection, and free surveys ensuring safe, accurate assessments.

SEARCH & RESCUE

Deploy ROVs for rapid underwater search in emergency situations. Supports life-saving missions with enhanced visibility and maneuverability.

MARITIME

Inspection of berths, breakwaters, moorings, and submerged assets in ports and harbors to ensure operational safety.

DEFENCE

Assist naval operations with underwater surveillance and asset inspection. ROVs help ensure maritime security, mine detection, and tactical readiness.

RESEARCH

Enable deep-sea exploration and data collection with precision ROVs. Ideal for marine biology, underwater archaeology, and environmental studies.

Power and Desalination Plants

ROV-enabled inspection of seawater intake pipelines, diffuser systems, and outfall structures to ensure performance.

Our Customers Testimonials

Adani Power Limited

“Your team's expertise in deploying cutting-edge robotic inspection technology has significantly assessed the pipeline inspection process. The comprehensive reports generated have proven invaluable in identifying potential issues and ensuring the integrity of our ACW pipeline. Once again, we extend our gratitude for your services.”

Navalt

“During the inspection, the ROV was capable of providing HD quality videos of the rudder and propellers, which were satisfactory. Also, the vehicle was found safe operationally and was maneuverable in tight spaces too. The videos of underwater structures were also live-streamed and with which we were able to guide the vehicle to required points of interest to have close visuals.”

KSCADC

“The Surveys were conducted at offshores of selected fishing villages like Adimalathura and Pallom of Trivandrum district at a depth of 30-40m. We appreciate the entire team of EyeROV for their excellent service and commitment in the conduct of underwater study.”

The Indian Navy

“Innovative approach towards Mission Accomplishment and Commitment of the team is highly praiseworthy. ROV Operations were carried out in different weather/sea conditions in a professional manner.”
